

IAA 2019: Webasto Shows System Competence for Mobility Trends

Stockdorf/Munich – August 26, 2019 – At this year's IAA in September, Webasto shows its broad range of solutions for current mobility trends under the motto "Future Mobility Driver". In **hall 8.0, booth D10**, the system partner of almost all automobile manufacturers introduces innovations relating to autonomous driving, electromobility and interior comfort.

As a premiere, the world market leader for roof systems presents its "Roof Sensor Module" - the solution to integrate sensors, cameras and associated features into the roof system of autonomous vehicles in an aesthetic way.

With many years of expertise in thermal management and electronics development, Webasto is also able to offer highly efficient system solutions for electromobility. Webasto demonstrates this with its standard battery system including vehicle interface box and associated electric heaters as well as the new intelligent charging station Webasto Live.

Several heaters and innovative lighting and shading systems in the roof complete the portfolio for comfort and experience in the cabin.

Webasto will also be presenting its innovative product concepts for the mobility of the day after tomorrow in a digital "Future Car".
